19. ABSTRACT (Continue on reverse if necessary and identify by block number) This report presents detailed cost data for each of fourteen categories of Outpatient Non-availability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the Third Quarter Fiscal Year (FY) 1993. Ambulatory services also list separately the OCHAMPUS-assigned procedures associated with each category's facility-related charges. Appendix A summarizes by category of ONAS procedures and catchment area, the Third Quarter costs for amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), percentages of TGP to ABS and to AAS, and of TPP to TGP. Appendix B correspondingly shows the number of services and patient episodes, and averages of ABS, AAS, and TGP by service and by episode. Each of these appendices contains a summary combining data for all areas. Appendices C and D retabulate Second Quarter data for the unassigned area and eleven catchment areas having facility-related charges erroneously included in the ambulatory #72 Strabismus Repair category. Appendix E compares the unassigned and all catchment areas' inpatient, ambulatory, and total ONAS professional services totals over the Second and Third Quarters, and provides a summary over all areas.

Executive Summary

This report presents detailed cost data for each of fourteen categories of Outpatient Nonavailability Statement (ONAS) CPT-4 procedures, grouped by inpatient and ambulatory professional services, performed within assigned and unassigned Army billable medical treatment facility catchment areas during the Third Quarter Fiscal Year (FY) 1993. Ambulatory services also list separately the OCHAMPUS-assigned procedures associated with each category's facility-related charges. Appendix A (pp. A-1-120) summarizes by category of ONAS procedures and catchment area, the Third Quarter costs for amounts billed by the provider for ONAS services (ABS), amounts allowed for the services by the fiscal intermediary (AAS), payments made by the patient and other sources (TPP), total government payments for the services (TGP), percentages of TGP to ABS and to AAS, and of TPP to TGP. Appendix B (pp. B-1-120) correspondingly shows the number of services and patient episodes, and averages of ABS, AAS, and TGP by service and by episode. Each of these appendices contains a summary combining data for all areas (pp. A-121-124, B-121-124). Appendices C and D (pp. C-1-13, D-1-13) retabulate Second Quarter data for the unassigned area and eleven catchment areas having facility-related charges erroneously included in the ambulatory #72 Strabismus Repair category. Appendix E (pp. E-1-38) compares the unassigned and all catchment areas' inpatient, ambulatory, and total ONAS professional services totals over the Second and Third Quarters, and provides a summary over all areas (p. E-39).

Outpatient Nonavailability Statement professional workload is presented by both services and episodes. Episodes were computed by sorting claims by patient identification number, treatment ending date, and procedure. All claims for a unique patient/date/procedure level were counted as being one episode. Using the patient per episode logic effectively controls for service billings where, when applicable, the technical and professional components are billed separately.

Total government payments for the claims, amounts billed and allowed for the ONAS services (ABS, AAS), number of services, number of episodes, and additionally the total amount allowed for the claims were then grouped and summed by billable medical treatment facility catchment area, by type of professional service (inpatient/non-facility ambulatory services/ambulatory facility-related charges), and by ONAS category of procedures. Government payment for each category of ONAS procedures was estimated by aggregating within each group the sum of the total amount allowed for the service, the total amount allowed for the claims, and the total government payments for the claims. Each group's amount allowed for services was then divided by its amount allowed for claims and this ratio was multiplied by the group's sum of government payments for the claims, thus obtaining the total government payment for the category of ONAS services.

Transactions having no government cost, no patient cost, and no total amount allowed were deleted prior to summation, as well as those where the fiscal intermediary denied the claim.

Each ONAS procedure record in the Third Quarter FY 1993 data was extracted from the TCSDP main database based upon a processing date in that quarter. Amounts in these tables may reflect an unstable condition due to part of a claim payment being processed outside the time interval (i.e., the Second Quarter FY 1993, or the Fourth Quarter FY 1993). Whenever possible, obvious unstable conditions were marked with an asterisk (*). Sometimes under these unstable conditions, some equations were not computed. In such cases, a decimal point (.) was used to fill space for answers not computed. Decimal point notation was also used to fill space when a variable had no data for a grouping. In addition, on several occasions the number of episodes for a procedure is greater than the number of services. This occurred when one of the services was an adjustment and no workload credit was given.

In June 1993, OCHAMPUS revised the CPT-4 procedure code groupings which comprise the categories #61 GYN Laparoscopy (from procedures 58980-58996 to 56300-56356, excluding 56355), #62 Cataract Removal (from 66830-66985 to 66830-66984), and #72 Strabismus Repair (from 67311-67343 to 67311-67337 and 67339-67340). These changes in CPT-4 procedure code ranges are detailed in Table 1 at the end of this Summary (see p. 7). Table 1 also exhibits changes that were made by OCHAMPUS to the ICD-9 surgical procedure codes encompassing the ONAS categories. All of these changes were effective and implemented at the fiscal intermediary level as of June 14, 1993. This report incorporates all CPT-4 procedure code modifications made as of the effective date. Codes recently dropped from ONAS categories were included in this report if the patient's Care Begin Date on the claim was prior to June 14. This allows late transactions, whether from tardy submissions or claim clarifications, to be counted, as well as any adjustments to prior claims. If the Care Begin Date was on or after June 14, transactions with these deleted procedure codes were not included in this report.

Another major OCHAMPUS change during the Third Quarter was to require CHAMPUS claims processors to report facility-related ambulatory surgery charges from a non-institutional claim when an ONAS is required. Previously, CHAMPUS claim processors had been requested to report these facility charges, but the process was not mandated until April 6, 1993. Table 1 at the end of this Summary lists the OCHAMPUS-assigned facility procedure codes for each of the fourteen ONAS categories.

Concerning this reporting policy, the OCHAMPUS ADP Manual, Chapter 2, Addendum F, Page 2.F-23, C-6, April 6, 1993 is quoted as follows:

"PROCEDURE: The CHAMPUS claims processors are required to use the above OCHAMPUS codes to report facility-related ambulatory surgery charges on a non-institutional HCSR when an ONAS is required. They will convert the revenues (if submitted on a UB-82), or other CPT-4 codes (if submitted on another claim form) to the appropriate OCHAMPUS code from the above list, and report it along with the facility charges on a non-institutional HCSR. All facility charges are to be summarized and reported under the appropriate code; no itemization is to be reported.

If multiple surgeries are performed during the same episode of care, the claims processors should attempt to report the facility charges for each surgery using the appropriate code from the list above. If this is not possible, all charges should be summarized and reported under the primary surgical procedure code."

The outcome of the above action on this quarterly ONAS report is that Appendices A and B now summarize and segregate, for the unassigned and assigned catchment areas, all reported facility-related charges for each ONAS ambulatory surgery category for the quarter. The new format for this type of appendix is to list the charges for ONAS inpatient professional services procedures by category followed by a subtotal and total, then ambulatory professional services procedures by ONAS category with subtotal, followed by ambulatory professional services facility-related charges with subtotal, a total for all ambulatory procedures and facility charges, and lastly a total for all inpatient and comprehensive ambulatory charges. Facility charges will not be included in the quarter-to-quarter comparison tables (Appendix E, pp.E-1-39) which report the total of CPT-4 procedure charges for inpatient, ambulatory, and the total of inpatient and ambulatory professional services for each assigned and unassigned catchment area and summarize over all areas.

The above changes directed by OCHAMPUS during the Third Quarter FY 1993 resulted in the revealing of an erroneous situation that had occurred in previous reportings of the #72 Strabismus Repair category for ambulatory professional services. Prior to June 1993, OCHAMPUS defined this ONAS category as being comprised of CPT-4 procedures 67311-67343. However, the OCHAMPUS-assigned procedure code for the facility-related charges for the Strabismus Repair category (#67338) fell within this legitimate range of ONAS CPT-4 professional services procedure codes for the category. As a result, charges for this facility code have been inadvertently incorporated with the Strabismus Repair ambulatory professional services procedures category on past ONAS quarterly reports. However, according to OCHAMPUS, few CHAMPUS claims processors were reporting facility charges during prior time periods, necessitating OCHAMPUS to issue the compulsory procedure statement in April 1993.

Reprocessing Second Quarter FY 1993 ONAS data showed that eleven catchment areas and the unassigned area had the OCHAMPUS-assigned ambulatory facility-related procedure code #67338 in their data. In total, this amounted to no more than \$30,500 in total government payments for the quarter over all twelve areas (see Appendices C and D, pp. C-1-13, D-1-13). Appendices C and D attempt to adjust this false inclusion in the Second Quarter ONAS report for the eleven catchment areas and the unassigned area which had data with facility-related charges #67338. These appendices simply retabulate the data given in the Second Quarter FY 1993 ONAS report (Health Services Command Publication Outpatient Nonavailability Statement Procedures, Health Services Command Catchment Areas, Second Quarter, Fiscal Year 1993 With Comparisons To First Quarter, Fiscal Year 1993, RP 93-015, DTIC: AD A264 190, April 1993) by summing, for each area, all inpatient professional services into one total, all ambulatory professional services except the Strabismus Repair category into another total, the ambulatory Strabismus Repair category less procedure code #67338 into a third total, and lastly totaling the separate costs of the Strabismus Repair ambulatory facility-related charge #67338. Summary tables were also computed for both appendices (see C-13, D-13) but only summarize data for the unassigned area and the eleven catchment areas in Appendix C and D which required adjustment for the Second Quarter. Those catchment areas can now correctly note costs and workload for the ambulatory Strabismus Repair professional services procedures category for the Second Quarter. Appendix E's quarterly comparison tables in this report (pp. E-1-39), have had Second Quarter data adjusted to remove this facility-related charge and do not include any facility charges in either quarter.

Thirty-one medical treatment facility catchment areas and the unassigned area were credited with some ONAS ambulatory facility-related charges during the Third Quarter of FY 1993, and in total, all fourteen ONAS categories showed activity of this kind. Six catchment areas had no reported facility charges. Total government payments for all Third Quarter ambulatory facility-related charges were \$1.25 million, with ABS, AAS, and TPP at \$1.48, \$1.33, \$0.08 million respectively for a total of 4,687 services and 841 episodes (pp. A-123-124, B-123-124). The highest in government payments for any one ONAS category during the quarter was \$260,468 in the #64 Myringotomy/Tympanostomy category with \$299,793 in billings, \$267,479 allowed, \$7,011 paid by the patient and other sources, 988 services, and 242 patient episodes. The category with the lowest government cost for this type of charge was the #69 Hernia Repair category at \$20,602, \$29,607 billed, \$26,152 allowed, \$5,550 paid by patient sources, 170 services and 11 episodes (pp. A-123-124, B-123-124). Average amounts billed per episode for an ONAS facility-related ambulatory category ranged from \$900 to \$2,911 during the quarter, while the corresponding average amounts allowed per episode for these two categories were \$768 to \$2,613, and similarly average government payments per episode were \$677 to \$2,570 (pp. B-123-124).

The remaining statistics presented in this Summary are taken from Appendices A, B and E and are only applicable to inpatient professional services with corresponding ONAS procedure codes and ONAS ambulatory professional services excluding facility-related charges. Professional claims submitted while the patient was either an inpatient at a hospital, or when a hospital submitted institutional billings for an ambulatory episode in conjunction with the ONAS professional billings are services labeled Inpatient Professional Services in Appendices A-E. From Appendix E, TGP for all inpatient and ambulatory professional services procedures in a catchment area for the Third Quarter FY 1993 ranged from a low of \$10,241 to a high of \$197,722, with the corresponding ABS from \$27,265 to \$305,435, AAS from \$19,172 to \$222,962, TPP from \$8,753 to \$37,234, number of services from 54 to 939, and number of episodes from 39 to 785 (pp. E-33, E-37). Total government payments for all ONAS procedures, whether inpatient or ambulatory, in all catchment areas for the quarter were \$5.33 million, while ABS, AAS and TPP for the identical services/episodes were \$12.71, \$7.67 and \$3.67 million respectively (pp. E-39). The number of services for ONAS procedures in total across all assigned and unassigned catchment areas was 24,710 with 18,654 patient episodes (pp. E-39). In the Third Quarter, 24.9% of TGP for all ONAS professional service procedures, 21.0% of the corresponding number of services, and 23.5% of the episodes were for inpatient professional services (pp. E-39). System-wide, the professional services ABS per episode ranged from \$349.01 to \$1,717.84 for ambulatory professional services depending on the category of ONAS procedure (pp. B-122-123).

Total government payments rendered for ONAS inpatient and ambulatory professional services over all catchment areas for the Third Quarter ranged from only 31.5% to 58.8% of what was actually billed by the provider (pp. A-121-123). Again, the government paid from only 54.4% to 100.0% of the amount allowed by the fiscal intermediary, when examining all catchment areas as a whole. Some tables in Appendix A may compute TGP as being 100% of AAS and/or ABS. This condition is usually confined to when the patient is treated on an inpatient basis and there is no co-pay. The differences between what the government actually paid and what was either allowed or billed were a result of disallowed charges, patient co-pays and deductibles, and coordination of benefits (other health insurance payments) which designated CHAMPUS as second payer. These "adjustments" to billed and allowed charges, as demonstrated above, are substantial. Depending on the category of ONAS inpatient and ambulatory professional services, the total amount paid by patients and other sources (TPP) over all catchment areas ranged from 0.0% to 122.7% of the total amount paid by the government (pp. A-121-123). Correspondingly, for the two ONAS categories comprising the endpoints of the above noted range, TPP varied from 0.0% to 41.5% of the amount billed by providers (ABS) and from 0.0% to 67.3% of the amount allowed by the fiscal intermediary (AAS) (pp. A-121-123).

Appendix E compares Second Quarter to Third Quarter FY 1993 summary totals by catchment area and type of professional service (pp. E-1-38) including an analysis for the unassigned area. A summary table combining the unassigned and all assigned catchment areas (p. E-39) is also presented. This recapitulation table points out that inpatient professional services increased between the two quarters in all measures; number of services increased 13.57%, number of episodes 10.35%, TGP 6.84%, ABS 24.79%, AAS 10.56%, and TPP 43.62%. Ambulatory professional services over all areas also exhibited across the board increases between quarters; number of services escalated 26.77%, episodes 15.21%, TGP 6.79%, ABS 13.65%, AAS 8.50%, and TPP 13.94%. Between the Second and Third Quarters, combined inpatient and ambulatory ONAS professional services for all areas showed growth in TGP by \$339,234 (6.80%), ABS by \$1,767,366 (16.15%), AAS by \$630,046 (8.95%), TPP by \$579,594 (18.73%), number of services by 4,743 (23.75%), and number of episodes by 2,295 (14.03%) (p. E-39).

Technical Note. The following TCSDP data were utilized for report:

* Changes - effective date and implementation: June 14, 1993. Per DoD, CHAMPUS Policy Manual, Volume 11, Chapter 4, Section 2.1, Pages 2.1-2.2.1.3, Revision No. 13, Revision Date June 4, 1993, OCHAMPUS Publications System Change Transmittal for CHAMPUS Policy Manual, OCHAMPUS 6010.47-N.

** CHAMPUS claims processors are required to use the above OCHAMPUS codes to report facility-related ambulatory surgery charges on a non-institutional HCSR when an ONAS is required. ... All facility charges are to be summarized and reported under the appropriate code; no itemization is to be reported. CHAMPUS ADP Manual, Chapter 2, Addendum F, Page 2.F-23, C-6, April 6, 1993.

*** Procedure #67338 was previously defined by OCHAMPUS as a selected outpatient procedure in the valid range of ONAS CPT-4 codes for the #72 Strabismus Repair category. Because of this, it is possible that any Facility Charges for this category which were reported under the OCHAMPUS-assigned #67338 procedure code were mistakenly included with the costs and workloads from outpatient surgical procedures in previous ONAS quarterly reports.
